-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 3,6 and 18-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on May 5, 2005.
2. Applicant's election of species I (figures 1-3) in the reply filed on May 5, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1,2 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6467193 (Okajima).

Okajima teaches a footwear liner as claimed including a tightener (16) engaging the heel portion, a lock comprising a front tensioning system (lace 18 and knot which is

the same lock shown in the first embodiment of applicant's invention), and a lateral tensioning element (51).

5. Claims 8-10 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6467193 (Okajima).

Okajima teaches an article of footwear as claimed including a sole (12), a control element (62), a channeling element (the unnumbered element extending around the lower heel portion of the footwear), a draw is a rear lace (46) having a first end secured to the control element (62) and a lock comprising a front tensioning system (lace 18 and knot which is the same lock shown in the first embodiment of applicant's invention), and an lateral tensioning element (51).

6. Claims 1,2,4,5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5992057 (Monti).

Monti teaches a footwear liner (upper 112) as claimed including a tightener having a medial draw and a lateral draw crossing at the upper end (straps 122 crossing in the upper end of heel) engaging the heel portion, a lock comprising a front tensioning system (lace 130 and knot which is the same lock shown in the first embodiment of applicant's invention), and an lateral tensioning element (136). The upper 112 is inherently a footwear liner inasmuch as it has all of the structure as claimed and since the shroud 402 covers it.

Allowable Subject Matter

7. Claims 11-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including:

-“The reply must present arguments pointing out the *specific* distinctions believed to render the claims, including any newly presented claims, patentable over any applied references.”

--“A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section.”

-Moreover, “The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims. Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06” MPEP 714.02. The “disclosure” includes the claims, the specification and the drawings.

9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
